India poor population is approx. 1.3B and because of the high density of population and malnutrition, immunity of people is a challenge and hence the speed of infection and mortality rate because of corona infection is becoming higher. High time for us to use our ancient Ayurveda and build our immunity strong to defeat the virus and come out of the pandemic. In this project, we have only considered a small portion of population, but we need to ensure 80% population of India start taking immunity booter to come clean on corona front for which there will a need of larger funds.
